Communication is a great thing, when it goes right but when things go wrong major Catastrophes on be the result. World Wars, Jumbo Jet crashes an even a missing top priority story like 'Where did the money go?'. Which, after being re-written, so to the printers and asked them to replace last wed page three, it didn't make it. As a result the instructions were misunderstood and what you got we 'withdrawn due to legal advice'; well never me because we've got it this week. I, also, suggest we read it, it's your money. We have restrained ourselve and presented only the facts - no rumours, no a trapolations - just the facts. Also check out polytical for more on the recent developments.

Things seem to be on the move in Wellington NZUSA have just sold their promises in Courtney Place and are going to buy a hour to convert into offices, a move that means they have now got surplus money to play with. What is down with this money is yet to be decided. Several option are possible, the money could be invested and use to keep fees down in future years, the money could be refunded to the student associations, and a multitude of other uses are possible.

Enough of this serious stuff, Capping is Coming Yes you should be working on those rafts and capping stunts NOW! This year is looking like a good one with several new events planned, some old one returning (some very old).

This issue has an article on Drinking games, the Shriekback Review, last weeks 'withdrawn due legal advice' article on a recent development around the association plus the usual regulars.

By the way there's a party at my place this Saturday (fancy dress). So till my next go at it --

game features arm actions and sound effects. In everyone in the game holds their arms out in of them horizontally, and makes a droning noise. tarter then puts their thumbs in their ears, shakes ngers violently and makes a siren noise. The perm their right puts their right thumb in their ear, g fingers and leaves their left arm out in front of The person on the starters left puts his thumb r left ear, their right arm out front.

starter then points to another person in the circle then does as the starter just did, the person on his does as the person on the starters right did, the n on the left

someone gets it wrong they have to imbibe!

Chairperson

1 coin for each participant (all same size). The called International Rules, these are a set of rules chairperson mixes all coins without looking and then puts them in a pile on the table so that only the top one can be seen as head or tail. He then asks each person in turn around the group to guess whether the next coin is heads or tails, they then remove each coin successively, if the guesser is right, chairman imbibes, if wrong guesser imbibes. Then proceed around group until everyone has guessed then next person becomes chairperson. Alternative is for guesser to keep going until he/she gets it right. This requires more coins or repeated shuffling or mixing.

Miscellaneous

This would have to be the simplest of all drinking games. People sit around the table, one person imbibes, and says 'Next'. The next person then has a certain amount of time to imbibe and say 'Next'. This continues on until people get sick of it.

Psycho

This involves people sipping drinks in sequence around the group until someone imbibes, when this happens the sequence reverses and the person before has to skull, the next person after that has the option to skull or to sip. If they Skull then the sequence changes direction again and the next person has to skull again. This can become very nasty if you get caught inbetween two Psycho's you end up skulling twice as much as them as they skull each time changing direction back towards you and you have to skull

In the next instalment I shall cover such classics as Mexican, Cardinal Puff, Fuzzy Duck, Jacks and Ripple Tipple.

'Til then, Cheers

a sexual abuse prevention kit for young people

STANDING STRONG is a sexual abuse prevention kit. It is designed for use in New Zealand high schools and organisations involving young people.

It was compiled by women and men who work with young people as counsellors, teachers, and youth programme supervisors.

Those who work in the area of sexual abuse and rape counselling have long been aware of the very widespread and destructive nature of sexual abuse in New Zealand society. The extent of this abuse in our communities is now being more openly acknowledged, and we believe it is appropriate for a prevention programme to be incorporated in the Health and Social Education programmes.

STANDING STRONG has been produced in response to the urgent need for young people to have relevant information about sexual abuse. It has been written for young people - the language kept simple and straightforward, with excellent design and illustration. The contents include short stories, questionnaires, discussion topics, exercises and information, laid out in a colourful magazine format attractive to teenagers.

Sally Liggins co-writer and co-ordinator of Standing Strong.

The series consists of three booklets and a teacher's handbook, containing extra information for teachers, parents and supervisors.

FACE VALUES

attitudes that lead to sexual violation looks at the effects of conditioning, sex role stereotyping and self-esteem on people's behaviour.

The intention is to encourage young people to question the values in our society that lead to exploitative sexual relationships. Short stories provide positive role modelling.

MY BODY BELONGS TO ME

what to do about sexual violation contains information vital to every young New Zealander. It describes different forms of sexual abuse, outlines choices about where to go for help, and clarifies how to help a friend who has been sexually abused. Self defence information is also included.

RAPE

information for young people looks at what is likely to happen when a young woman has been raped. It clearly shows her options, and details the police reporting and court procedures. This booklet also focuses on the responsibility of males not to coerce or pressure girls to have sex. It includes a list of sex-

CHAPLIN'S CHAT PAWNS, PIECES, OR **PRECIOUS?**

During the excavation of the Kaimai Tunnel a party was trapped by a cavein for three days. When a hole was cut through to them, the first thing they asked for was the song 'Che Sera Sera' -What will be, will be.

But was the accident that trapped them or the skill that rescued them FATE? Do you believe that 'What's for you will not go by you?' - that perhaps in the ARA fleet there is a bus with your number on it, and when the stars form their right conjunctions, it will come along and mow you down regardless?

At the other end of the scale, Henley's boast 'I am the master of my fate: I am the captain of my soul', is equally unsustainable. Individual freedoms are limited by the decisions of others, by the events that occur, by our mortality and vulnerability. Was the young man who received head injuries when a drunken speedster knocked him off his bike living out Henley's dream?

St Paul asserts that God is at work in all things for good with those who love him (Romans 8:28).

Jesus asserts that God is at work making the sun to rise and the rain to fall on the just and the unjust alike (Matthew

Fate or freedom, particular or general providence? Or is it, in the famous words of Henry Ford 'Just one damned thing after another!"?

JMK for the Chaplains

"KILL THE ..."

... A sentiment hardly appropriate for honourable members of the religious establishment.

But they were provoked, antagonised, exposed.

Seething hate, malice and envy met the reality that had shattered the facade and exposed their corruption.

He was a bad enemy. It was impossible to provoke him, to draw him, to even expose any weakness. Their warped religion only palled before his vigorous and majestic ethic in its promise of release from bondage, its reality and possibility ...

... An ethic of selfless self-giving to fellowmen (especially the despised ones) that he himself embodies. A reality of love, compassion, healing and restoration exposing the illusion of callous indifference, hatred and death.

But they hated him most, not because he was good and they were evil, but because he said he was God. In their guts they knew he was and they hated him ... All you can do with an interfering God is kill him.

So they did.

But can't you see? He was back: seen again, touched, danced with, laughed with ... by those who loved him. His enemies didn't hate him just because they were religious; nor because they belonged to the establishment. Their problem was that they were humans.

Humanists hate Jesus. They hate him because his reality breaks in and destroys their comfortable illusion. They hate him ... by belittling him, by ignoring him, by seeking to destroy him, by reducing him to a level of their own. He is everything that they are not ... and they must avoid him.

He is claimed to be God and demonstrated that he was. He is still alive. You can't ignore him. Either you hate him or you love him. You are for him or against him.

In hating him you kill only yourself. - Broadsheet produced for Sydney Uni EU supplied by Stephen Coyle

The Search for Otto...

* Lost Pup *

We have lost Otto our 8 month old beagle. He is honey and white. He disappeared from Freeman's Bay on Friday April 3rd. If you can help please phone Carol or Peter Ph 766-771, or Helen Ph 866-668. REWARD.

LUNCH-TIME FIESTA

Wednesday 22nd April, in Shadows, 12 noon - 4pm. Latin American food available. All Welcome.

CATHSOC

National Catholic Tertiary Students Conference is on in Dunedin in May this year. The theme is 'Our Church, Our Dream'. Details are available from your local Catholic students group. See you in Dunedin from May 14 to May 17.

Guide to Cheep Eats

BONAPARTES

Dear Reader, no this is not cheap eats. But it was for me because an ex-flatmate shouted me dinner there. So follow, people who are going to be shouted somewhere, I recommend Bonapartes because they put big chunks of pineapple in their non alcoholic cocktails (as soon as the waiter turned his back I ate it. Hell I never get to eat fresh pineapple!) and they have real red roses everywhere!

A word about Bonapartes' decor: Well, apart from having that really expensive House of Mason Wallpaper that you have to get especially printed, tasteful prints of Napoleon and two certificates that said they won the goldplate in excellence for food or something; the toilet seats in the womens were just amazing. They had French coins set in this clear plastic - but it was a real letdown to see they just had Purex, I mean I sort of expected Fluffy designer rolls.

The Nosh, well that was pretty good stuff too. I had French Onion soup and my friend had scallops. Then we had this sorbet to clear our palates for the next course, compliments of the house. For mains I had vegetarian crepes that the kitchen made especially for me and my good ex had Pork with Mushroom sauce. My friend said he still felt a bit hungry but I had had ample sufficiency and how. So we stuffed down a bowl of fruit salad each for pudding and left in time to make the Shriekback Concert.

Another amazing thing about this joint was they kept giving me a clean ashtray every course.

I'm sorry but I can't tell you how much the dinner cost because my menu didn't have any prices on it.

coffin as well.

P.S. They also had a grand piano that looked like a

Banqueting on a Bursary

Your turn to cook? Here's a really easy but yummy chicken recipe that takes 5 minutes to prepare and then you can throw it in the oven and forget about it for an hour:

VICKI'S CHICKEN & CHIPS

Chicken pieces (1 or 2 per person) melted butter potato chips (1 large bag will be heaps)

Dip the chicken pieces in the melted butter. Crush the potato chips until they are in small bits, if you have garlic salt, you could add a shake for flavour. Next cover the chicken with the potato chips and place in a casserole dish. You can pour any leftover butter and chips over the top. Bake in a moderate oven (350°F) for about an hour to an hour and a half.

V.T.

PREVIEWAREWER

Eddie Jillette, (Richard Gere) and Michel (Kim Basinger) in the swamps of the Louisiana Bayou.

Eddie Jillette (Richard Gere), a tough, uncompromising Chicago cop vows revenge when his partner is killed by Losado (Jeroen Krabbe), a merciless kingpin from Bayou country. Journeying to New Orleans, Eddie finds himself attracted to his only lead and sole witness, Michel Duval (Kim Basinger), a beautiful Cajun woman whom Losado loves. The mysterious backwater Louisiana swamps and streets of New Orleans are the setting for the dangerous world of violence and intrigue.

NO MERCY

Producer D. Constantine Conte describes NO MERCY as an 'an exotic romantic thriller. He was involved in the development of the film's original screenplay with writer Jim Carabatsos. Intrigued by the amalgam of suspenseful storytelling and vivid characterization in Carabatsos' first draft, director Richard Pearce and Richard Gere quickly committed to the project.

Pearce and Gere went to work with Carabatsos on the creation of a shooting script, with Gere making suggestions about both Eddie Jillette and the general tone of the piece. 'Richard Gere was continually at work from the moment he decided to do the movie, Pearce says. 'He has a passionate respect for every part of the film making process and participates in as much of it as he can as an equal partner, not as a star. He's as hardworking an actor as any I know.

When Pearce travelled to Chicago to make final decisions about locations there, Gere went along, familiarizing himself with Eddie's world by spending many hours riding with Chicago undercover cops. In his sometimes frightening visits to the city's seamiest and most violent neighbourhoods,

A leading lady was next on Pearce's Conte's casting agenda.

'Maybe because Michel does a torn dance at the Blue Parrot Club; Con says, 'I thought that for this role, too, needed a totally modern equivalent of great '40s star in her most famous m -- namely Rita Hayworth in 'Gilda'. A Kim Basinger was the only actress wh I felt could generate the kind of exc ment that Hayworth did - and who cou also meet the other demands of the pa

Pearce outlines those demands: 'Mich is a wonderful blending of innocenand experience, someone who has never been outside the control of a man, bare able to write her name or make a choice for herself. She is a pure creature of in stinct in a world of sexual and emotion violence almost unimaginable to most of us. Kim Basinger has a kind of feral, in tuitive intelligence that was just right for Michel?

Executive producer Michael Hausman who had produced Pearce's 'Heartland' and 'The Gardener's Son', joined M MERCY to work with Conte in gathering the finest artists and craftspeop available.

DISTURBING THE PEACE

Aucklanders will have no opportunity to hibernate this winter. The country's leading entertainers are out in force 'DISTURBING THE PEACE'.

The LIMBS DANCE COMPANY, Wellington illusionist TIMOTHY WOON, the undisputed DOYENNES of New Zealand music, WHEN THE CAT'S AWAY, and special guests including the inimitable TOPP TWINS will present their 10-show cabaret season DISTURBING THE PEACE at His Majesty's Theatre in

More than 30 individual artists will appear in the two-hour show of hot music, magic, comedy and dance. Limbs Dance Company, producers of the show, promise a large-scale production with plenty of lighting and stage effects, a zany set and the best quality entertainment New Zealand can offer.

Limbs have commissioned New York choreographer Brian Carbee to create a series of high-energy jazz dances with an anarchic theme; organised crime, art theft, designer drugs, domestic disputes and President Ronald Reagan are just some of the subjects given a gentle bashing by Carbee's wry humour.

Wellington illusionist Timothy Woon is not known for noise or brashness but his carefully choreographed mixture of magic, fire and illusion should generate thunderous applause. Woon's slick and stylish new act won him two of the top awards at the 1984 International Magicians' Convention in Melbourne Auckland audiences saw him for the first time in a successful Gluepot season with Limbs in april last year.

Stunning new band, When The Cat's Away, can't fail to disturb the peace. Annie Crummer, Margaret Urlich, Debbie Harwood, Kim Willoughby and Dianne Swann, all virtuoso performers in their own rights have created near riots at their rare collective performances in recent months.

PAUL WOODGNOME

'Woodgnome', better known as Paul Igglesden, will be touring campuses during March and April with an exhibition of 30 of his works. His early influences included van Gogh, Raoul Duffy, Phil Clairmont and Gretchen Albrecht, and he has presented his work to the public since 1985, with exhibitions at the Wellington Unemployed Art Studio, Tasman Cafe and Square Edge in Palmerston

Paul describes himself as a tional artist, preferring a service satisfaction in his own work money that is to be earned promising his style. During New Zealand campuses, Paul painting a work at each venue short residency arrangement donate this work to the Association.

SUNDAY THEATRE

Bridget Armstrong appears in 'Flight of the Godwit' at the Drama Studio, Symonds St. Sunday 19th and 26th April, show begins at 6pm.

OPEN INVITATION

s himself as a referring a service his own work to be earned tyle. During his campuses, Para at each venue arrangement work to the

thoney ... Hightower ... Jones ... Heerry ... Zed ... Callahan ... Hooks etchuck. They and the rest of the crew are back and up to brand new in Warner Bros? riotous reing of the world's favorite busters in 'Police Academy 4: cas on Patrol,' which has our heroes another grave challenge with their and befuddled Commandant

rip. or the Citizens on Patrol promised, who is soon to retire. Lassard's is that the only way to stop street is to get neighbourhood watch prinvolved. He has decided to bring and volunteers from the community the Academy, where they will be the in life-saving techniques and after crime by our crew in blue.

ing crime by our crew in blue.

ining this eclectic group - consisting old people, young people, ethnic and borderline criminals - as an act and as an auxiliary to the police community crime is a difficult

Against Lassard and his Academyites we have the uptight Lt Harris (back from the first 'Police Academy') with his assistant, Proctor (who surfaced in 'Police Academy 2: Their First Assignment'). While Lassard is off attending the Annual International Police Chiefs' Convention, Harris takes over as Commandant of the Academy.

A strong law enforcer and traditionalist, Harris believes that civilians will get in the way of police work and he does everything underhanded to prove this point.

With Harris' 'help and instructions', our civilians are trained to disastrous (and comedic) results, and Lassard's high hopes and the program end in defeat.

Yet at the opportune moment, our cops and their civilian trainees rise from the ashes of ruin and are given the opportunity to show their newly acquired skills and become heroes. Considering that the first three 'Police Academy' films have grossed over \$380-million worldwide, the making of 'Police Academy 4: Citizens on Patrol' was as certain as sunrise.

That the previous three 'Police Academy' films achieved international blockbuster status was not surprising to producer Paul Maslansky. 'When I listened to the first audience reaction to the rough cut and I heard the laughter from the first reel to the last reel, I knew that I didn't care how the movie was scored or marketed or how the postproduction was. I knew I already had the laughs', he recalls.

The filmmakers have also introduced a continual flow of new and interesting faces. In the all new 'Police Academy 4: Citizens on Patrol' audiences will meet Mrs Feldman (BILLIE BIRD), an elderly and very enthusiastic senior citizen who would rather catch criminals than collect her pension; Butterworth (DEREK McGRATH), whose hands can always be found deep in someone else's pocket; Clarence, a huge dog of no particular ancestry; Corrine Bohrer, a timid flaky female who is thunderstruck in love with Zed; Kyle (DAVID SPADE) and Arnie (BRIAN BACKER), two House skateboarders; THACKER), who stands 6'6" and weighs 390 pounds, and Claire SHARON STONE, a gorgeous journalist who stands on her own two feet and can respond to Mahoney's quips with her own wisecracking dexterity.

Steve Guttenberg (Top) and Michael Winslow as Mahoney and Jones.

THE WEDNESDAY EVENING CONCERT REPORT

The 5.30 Concert, held at the School of Music last Wednesday was proof enough, to even the most critical student, that the School of Music is not dead but alive and well and living in Symonds St.

The concert featured two most qualified and exciting musicians; on Violin was Mr David Nalden and on Piano Mr Tamas Vesmas.

The concert consisted of three pieces of music. Though ranging quite markedly in both cultural origin and age, these three pieces blended superbly to produce a pleasantly varied and exciting evening.

The first piece was a Sonata in D, K 306 by Mozart: a very lively rendering with the Piano and Violin having great supporting roles. A well-integrated composition, most competently performed, and well received.

The second piece, also a Sonata, especially written for Violin and Piano by Debussy, was at times very passionate. However David appeared a little distracted at times, losing a little of the mystery. Tamas on the other hand appeared to be right on form, developing to the full all the Sensuality and Mystery of the piece.

The final of the three, also a Sonata, written by Prokofiev (No. 2 in D, Op 94); was a very fiery piece, again well received by the audience. There was some considerable difference from the fiery virtuosic playing, to the peaceful lyrical moments. Both musicians gave good emphasis to the strong rhythm, lyricism and fireworks of the piece.

On the whole an excellent choice of programme, played with great passion to an almost capacity audience.

Well done.

Not The President's Report

(Sung to the tune of the Lumberjack song)

"I'm a painter and I'm O.K.
Student's money is my pay
I sit in my office in a swivel chair
And shave my legs until they're bare

I don't know what's going on But I'm sure it's nothing wrong Come to Shadows and I'll be your mate I hope the I.R.D. won't be at heaven's gate."

Ode of an executive painter

I thought I would enhance your literary knowledge with this piece of prose. Being able to differentiate, the wet end of a paint brush from the dry, putty from a glob of Wrigley's, I find it very touching. Life is just a hole, unfilled amongst the paint smears, a transient flash which may be averted by painting white wash on your windows. I am a white wash expert.

Amongst all this meaningful comment I feel I (this happens a lot) as your non president, must express most terribly terribly reluctant as I am, disappointment in my peers, who quite frankly are a bunch of Wally's. If only they could be more like me ... I mean like the way they wrap their hair and their office decor gready to the Max... but most of all I wish they weren't so superficial and petty. In my state of frustration that the whole world isn't my clone. I leave you.

Next week I will discuss handy hints for the home handy man.

NOT THE PRESIDENT NOT A CROOK NOT WANTED BY THE IRD W.L.

PRESIDENT SIGNS HIS OWN PAYCHECK

In further developments in the Excecutive Property Services affair, it has been revealed to CRACCUM that AUSA President Graham Watson actually signed one cheque destined for the partnership Mr Watson is involved in, Executive Property Services. (See centre-spread article in this issue for full details of the affair).

CRACCUM has sighted the 5 cheques which were received by Mr Watson, which total \$5270.00. EPS, a partnership in which Mr Watson has a leading role, was responsible for painting an AUSA flat, following which the value of the job has been estimated at just over \$1000 (see centrespread). EPS was paid \$5270.00 for this job, in the form of five cash cheques given to Mr Watson.

Interesting points to note about these cheques are:

* The fact that EPS was paid in cash. This makes it impossible to trace the payment, so the payment could

theoretically be reclaimed.

* The fact that Mr Watson himself signed one cheque for \$1190.00, which he then received on behalf of EPS. It is important to remember that EPS were paid with AUSA funds, which are made up of all of your student association funds. After paying \$78.00 in fees to AUSA, students should be aware that President Watson has signed \$1190.00 of these fees into a cash cheque which Mr Watson then collected himself.

Further developments in the EPS affair.

- Executive Property Services had not paid tax on their \$5270.00 payment. AUSA executive on Wednesday April 8 asked EPS to return the tax (as a gesture of goodwill) by 5pm Friday April 10. EPS failed to return the tax, so the Inland Revenue Department has been informed.
- AUSA Accountant Chee Chung estimates that the total cost to AUSA of the EPS affair could be as much as \$10,000.00 when extra costs such as lost rent are taken into account.
- * AUSA President, Graham Watson, who is also an EM representative, entered the office of Chee Chung AUSA Accountant, against the wishes of accountstaff, to search for documents relating to the affective staff.

BONKSPACE REFERENDUM ON AGAIN

On April 28 and 29 a referendum will be held to a yes or no to this motion 'THAT up to \$20,000 be allowed from the building fund to divide up approximately the Top Common Room into eight soundproofed cubeach to be supplied with one bed'. Also on the related um you will have the chance to say whether or cigarettes should be sold on Campus, and vote to three vacant Executive positions, National Affairs vironmental Affairs, and SRC chair. AUSA publishing a four page election special with statements on these issues. CRACCUM published ticle on Bonkspace in our fourth issue. These are affrom the CRACCUM office. MARSHMALLOW REBELLION!

Have you ever wondered what would happen if marshmallows fought back? It happened last week in Little Cowshed, Iowa. Hank Jackson, local tough guy, was out duelling with his lassoo when he accidentally trod on Junior Smithers, a pink marshmallow. Junior's friends were very upset, and they retaliated by forming a marshmallow circle around and melting on Hank. Little Cowshed was stunned. For a century the local lawkeepers and their lackeys had kept the rebellious marshmallows under control, but now it was too late. The marshmallows, out to redress a century of grievances, rapidly formed themselves into coherent political and revolutionary groups. Already the entire state of Iowa is under Marshmallow law. The fanatical marshmallows, led by their wild (though soft-centred) leader Joe (stocky) Robinson, have a grudge to settle. Eastern USA residents will sleep uneasily tonight, for they knew the marshmallows are determined to reach New York.

Mr Hank Jackson in intensive care after a giant marshmallow wrapped itself around his head.

THE KELLOGS

Underground, underground, Wombling free....

But Harvey wasn't. Well he was underground, but he was no longer free. He was liquid. Scientifically speaking, a liquid may be free (unless it's petrol or beer), but it is the libertarian definition we are concerned with here. And this rather sinister big word had it seemed, deemed Harvey to be no more.

Liquidity aside however, Womblestania was undergoing serious economic problems. The hole in the ground which Harvey had opened up had also swallowed and melted a large portion of Wombletania's currency, the moohah. As the former Wombletanian finance minister Reg Sibling once said in a fit of profanity, 'The currency has become more ah, fluid than is desirable.' The political stage was now set, candidates had their noses to the proverbial grindstone, especially Player one, who had a stainless steel nose. While this nose was useful for headbutting, it was astonishingly painful and dangerous when it sneezed, as ball bearings were ejected at 180 km per hour. All of this though, is somewhat irrelevant to the elec toral conflict brewing in Wombletania. The alternative were now quite clear. Wombletania could opt for the col lective presidency of Players One and Two, or the political gamble of the furry unknown, Gerald.

Players One and Two made promises. They promised to change things. Under a Pinball Government there would be no death, no gravity, and bananas peelable from both ends. Wombletania would become a tax-free paradise, a disease free paradise, and a life-free paradise.

ADDS, a major social disease, was plaguing Wombletania. ADDS had perforated every form of the media, so to end this slow killer, Players One and Two would rid Wombletania of all life-forms, because after all, life only causes trouble. Wombletanian machines were delighted, and society was polarised into the living and the non-living. The life forms, being more than a little keen to preserve their 'living' status, rallied behind the only alternative to machine domination. Gerald, the furth unknown, was nervously persuaded to release his only policy statement. It went something like this:

Continued next week.

FIRST

Contributions to 'Camelcomicality' are welcomed. Please type double spaced, and give to David Ward in the Craccum (publications) office.

Where has all

Concern has been expressed to Craccum about the painting of a Student Association flat at 9 Glasgow Terrace, Grafton.

The work was carried out by Executive Property Services, an unregistered company specialising in home maintenance and light renovations.

Mr Graham Watson, Student Association President since 1985, is a partner in this firm.

In the week ending 27th March the Student Association was invoiced for 70 hrs of work.

According to the resident of the flat, 'Only a lady painter was working, but she was hardly around'.

Geoff May the property supervisor said he had visited the site 12 times during the month and noted '2 or 3 students, maybe 4, working on the job'.

The Association Secretary Pilar Alba stated that Graham had asked to be paid in cash.

When asked by Exec why, Graham replied 'None of your business'. \$5,270.00 was paid to Mr Watson. The cheque had been immediately cashed.

On March 31st the Students Assoc Finance Committee ordered an investigation into the affair.

Aarden Painting Contractors Ltd. supplied the report below. Assessment was done by Mr. R. Gillard, Manager of the company, and having been in the trade for over 30 years.

The report estimated the hours of work that had been done.

To Whom It May Concern:

The writer upon request from the above was asked to visit a property at 9 Glasgow Terrace, Grafton and give an opinion on the Interior Painting recently carried out. The following was found:

- A. Kitchen Ceiling and Walls were painted with a white Gloss Enamel, there were numerous misses, runs, insufficient coverage and appeared to have very little preparation carried out prior to painting.
- B. Ceilings to Bedrooms and Lounge were painted with what appeared to be a Gloss Acrylic (standard practice would be for an Oil Based product to be used rather than a water based Acrylic). These also exhibited many misses and insufficient coverage.

 An opinion could not be offered regarding mould growth to Ceilings, the immediately adjacent Walls at Ceiling height however showed either nil or non visible signs of growth.
- C. Windows and Door Frames to the above
 Bedrooms were also painted with a Gloss
 Acrylic rather than an Oil Based product which
 would normally have been used, the same inattention to preparation was markedly
 noticeable.
- D. Partial stripping of Bathroom had not been completed so no opinion could be offered other than an estimate of time involved on area that had obviously been worked on.

Assuming that each area painted had two coats applied, the following is an estimate of time and materials required to do the work that was actually carried out. i.e. No allowance has been included for preparation, stopping etc. as this appeared not to have been done. (on visual observation it appeared that not more than two coats were applied to any given area and in some cases possibly only one coat was applied.)

Lohaus Estimate		
Kitchen (64m²)	First Coat Second Coat	8 hours
Ceilings (5 rooms 78m²)	First Coat Second Coat	10 hours
Sashes & Frames, Doors & Frames	First Coat Second Coat	5 hours 5 hours
Stripping		6 hours

Material Estimate

(prices based on Resene Decorator product applied at the rate of approximately 40m² per four litre)

Kitchen Undercoat -

7 litres at \$39.77 per 4 litre

10 **◄** CRACCUM APRIL 22, 1987

\$69.59

High-Gloss Enamel - 7 litres at \$42.15 per 4 litre	\$73.76

2 litres at \$43.40 per 4 litre	\$21.60
Second Coat -	
2 litres at \$43.40 per 4 litre	\$21.60
Yours sincerely,	

A second assessment was called. Mr R. White the only painting consultant in Auckland whose assessment has a legal standing in the court of law, supplied this report.

AARDEN PAINTING CONTRACTORS LTD.

Re: Property - 9 Glasgow Terrace:

I have to report that at the request of your Association I inspected the interior work carried out at the above in your presence on April 2nd 1987, and found as follows.

INTERIOR PAINTING

I should point out that the work has been carried throughout by completely unskilled individuals. However, your Association will have to accept a reasonable sub-standard of work as it was known to you that the people who would do the work were students.

Kitchen:

The work here is an absolute disgrace.

There are excessive brush marks, runs and misses.

There has been no stopping of holes and defects.

The whole area requires to be properly sanded down & defects stopped & touched up & the whole area painted one coat undercoat and one finishing coat.

Normally I would condemn this work and place no value on it but as mentioned earlier you must accept some charge for this.

Ceilings throughout:

These have been very poorly painted and show lack of proper preparation and puttying. Coverage is poor.

Sashes, Doors & Frames:

An attempt has been made to paint some of these areas but is very poor and shows complete lack of preparation and sandpapering.

General:

You advise me that you have paid the sum of \$4,080.00 so far for the work carried out. I find this to be absolutely exhorbitant even had the work been carried out by a competent contractor. I have completely ignored the hours claimed to have been worked and prepared my costing on a yardage basis which includes labour and materials. Under the circumstances in that you knew they were not tradesmen, I am going to be over generous in my valuation of the work carried out except that in the Kitchen. My valuation for all work and materials etc., is a total of:-

\$709.00

*N.B. Note this figure is in error, actual amount is \$5270.00.

Although these two estimates are several hundred dollars different (\$1244.15 and \$709). It is still over \$4000.000 short of the EPS payments.

Both assessors found the work to be poorly done and incomplete. Kevin, an EPS Principal stated that 30 hours had been spent on the bathroom. At the time of payment the bathroom was only ¼ finished. About the reports, Kevin said 'I can actually agree with a lot of that.'

Kevin 'Some weeks there wasn't anybody on the job.'

Craccum understa perced by the Stud acting as the Overs The Secretary has who should-oversee Description.

the money gone?

Craccum understands that the cheque payment was apoved by the Students Assoc. Secretary, who was also ging as the Overseer of Student Rental Properties.

The Secretary has now asked the executive to consider ho should oversee these properties as it is not in her Job

Craccum wishes to raise the issue as to the relationship between Executive Property Services and office dealings n the Student Association. Should this relationship have been disclosed on a situation such as this, there perhaps nay not be some means of ensuring an independent aluation of work before payment is made.

I have already informed G. Watson who is my direct upervisor that I am not prepared to continue dealing with he overall supervision of the AUSA properties. I should have made this decision a long time ago; sometimes it akes a crisis to take action."

Pilar Alba has later said 'I am prepared to accept that made mistakes'.

This matter was brought to the Executive on Wednes-

0: I would like to ask the President whether you are anned that this matter was even broached.

Mr Watson: Yes.

Mr Watson: Because I don't think it has anything to do

At this time, Mr Watson was asked if EPS was a Partership, he stated the affirmative. When asked who the partners were he refused to answer. Mr Watson claimed e does file a partnership return of income and that he jeducts PAYE from employees.

G.W. ... we pay our taxes on our profits, no problem'.

When asked if he files his PAYE form each month, Mr Watson replied that he does file the PAYE form.

At this stage Mr Chan, the Student Association Auditor, reported on the business dealings with EPS.

in fact, on the invoices it said, perhaps it's not an voice, it is a piece of paper with photocopied letterheads of business cards on it, and it says 'Labour Hours'. Objously, the first thing that struck our enquiry is, has PAYE been deducted? Because in the past there has been rather a lot of these scheme things going on that help tudents out of the tax system.

The Inland Revenue has got power to overrule any arangement that is seen to help taxpayers evade taxes. The ultimate employer will be deemed to be the AUSA'.

This is due to EPS not being a registered company as there re no names of the people listed on the payment. he invoices received were not signed.

Phose people can go away having received cash cheques, can no way prove that we have paid them directly, we re liable yet again to pay the entire invoice amount should hey come up with one.

Worry has been expressed over the tax payments; as cash reques are unable to be traced to anybody or company ed could be cashed without records being taken to avoid

The Exec then asked if EPS was prepared to accept a ily appointed assessor's costing. Mr Watson replied, No, EPS would not alter charges. The Exec went on to pass two motions regarding EPS - see below.

Ist Motion, Wood/Heriot

That the auditors of the Association be requested to repared a report to the exec. on the following points...

The means of engagement of EPS The handling by members of the exec with personal

interest in EPS

The method and means of, a substantiation of, payment of AUSA to EPS.

The value received by AUSA in return for payments made by EPS, in the intereim all further dealings with EPS be suspended.

W. Waste of money to find out everything we do is the fering truth'.

2nd Motion, Wood/Heriot

That AUSA notify EPS that as contractors AUSA should have deducted withholding tax as labour only contractors at a rate of 20%, with withholding tax form had been completed, or 35% off if one had not from all payments to EPS and request EPS to return to us the appropriate forms and money as a gesture of good faith, if EPS fails to do the above by 5pm Friday 10th April 1987, AUSA will be obliged to bring the matter to the attention of the Inland Revenue Department.

NOTE: EPS did not return the appropriate forms or pay tax as requested by Exec by 5pm Friday April 10 1987.

The IRD has been informed and are now investigating the matter.

To summarise, Executive Property Services did some interior painting at a flat owned by AUSA. Two independent estimates of work done give \$709 and \$1244 as figures. Yet Graham Watson, as a representative of EPS, was given cash cheques for \$5270 for the work. This sum, in the words of one report, is 'absolutely exhorbitant, even had the work been carried out by a competent contractor'.

The money paid out by AUSA to EPS was Student fees. Craccum believes that the Student Association should give full consideration to the methods of employing, supervising and approving work done on properties owned by the Students Association, in order to protect your money.

Q: Has the President been acting in the best interests of

Mr Watson: ALWAYS.

These are the facts as known at time of printing.

In a startling development Mr Watson on Mon 13/4/87 entered and searched Mr Chee Chung's (AUSA accountant) office when Mr Chung was absent. The reason was unknown.

ad caught Shried ... well .. the i ad fills it in for neert (don't woi th vengeance)

SBARYSPHER

Brought to you By

and Bap " at the Globe

The support for this Religious experience was I.Q.U., who were badly mismatched. They would have been more suited to support Duran Duran.

They started out with an unaccompanied drum machine introduction, walked on stage, picked up their instruments and played, synchronizing to the drum machine. An exchange of verbal insults between the lead singer and members of audience meant they soon found themselves on the wrong end of the crowd and by the end of their half hour set some of the crowd were screaming for them to get off.

Well the crowd was in a great mood now, a late start and with a support band that went down like a gorilla in a Sheraton Bar. But when Shriekback hit the stage the transformation was instant, instant XTC. Which is no doubt some hangover from Andrews days in that band. Shriekback went on to rock the crowd into a state of exhaustion, finishing their show, and the second encore, where it started with 'Lined Up'. This is Undoubtedly the best live

Hello Happy Horticulturalists

This week we dabble with the silent, unseen and deadly - not it's not more Rogernomics, but rather electrons pulsing back and forth supplying our plants with the vital needs to photosynthesise. For most growers the amount of electricity used is of little concern. A 4 tuberegular 5ft fixture draws less current than a colour T.V. This means the increase to your power bill will be a few dollars a week.

However, if you are lucky enough to devote an entire basement or attic to their garden they might find an overload on the main supply.

Fluorescent light fixtures are sometimes sold unwired without a line cord, and the job is left to you. Wiring the fixture is very simple and anyone with no previous knowledge of electricity can do it.

Inside the fitting will be a 3 or 4 section connector block. All that has to be done is to fix a single phase cord - like the one on your Ghettoblaster. If you look closely at the connector you will see that the other side has 3 wires coming out of it. A red wire goes to the ballast, a black or blue wire to a light socket and

a green wire to the body of the fitting. Screw the cord to the connector and match up the colours i.e.

The other end of the card should be connected to a 3 pin plug.

looking from the back

If you have any trouble with your general wiring contact your local hardware shop and they might be able to set you right.

If not contact yours truly c/- Craccum and I will endeavour to keep you alive.

front view

Because of the aluminium foil, che and wet or camp floors, all of which good electrical conductors it makes mon sense to switch off your system before raising or lowering lights.

For long term effect it could prove thwhile to invest in a plug in timer su for about \$35. This will mean your control the amount of light supplies your plants. This means you can be long light cycle and provide the best ditions for the best heads.

That's all the engineering this next week a treat for all chem majors.

NEW ZEALAND UNIVERSITIES SPORTS UNION INC.

EXECUTIVE DIRECTOR

The New Zealand Universities' Sports Union calls for applications for the position of Executive Director.

The NZUSU is administered by a voluntary six-person Executive Committee who are elected annually. They employ an Executive Director to handle the day to day administration of the organisation. The Executive Director must be self-motivated with well established work habits and be prepared to work unsupervised.

The key areas of responsibility of the Executive Director can be segmented into four groups.

The first can be described as 'Organisational/Promotional/Liaison', the second as 'Planning/Developmental', the third 'Administration of the New Zealand Universities' Sports Trust' and finally, 'Administrative/Secretarial/Financial'.

NZUSU would welcome enquiries from any interested applicants. A full job description is available from:

The General Secretary N.Z.U.S.U. P.O. Box 27-200 Wellington Telephone: (04)851-515

TV SPORTS

Well sports has taken a funny turn -New Zealand's national sport has started in earnest. But you may not have noticed, especially if you inhabit the region in front of the T.V.

TVNZ showed how complete a grasp it had on reality by refusing to screen the Auckland-Wellington game live. Seems economic forces don't apply to our TV services. Despite the Rugby Football Union offering to waive broadcasting rights and let the camera's in for free. TVNZ felt it should not broadcast the game as it might bias the future negotiations between TVNZ and the RFU.

In other words bugger the public who pay for the TV service Lecause TVNZ thought it could use the denial to bludgen the RFU into a cheaper deal for the rest of the year. Talk about cutting off their nose to spite their face. One is led to ask if any sports will be broadcast if TVNZ thinks it can do a better deal

The RFU may well have tried to use the game as a sweetener to attract the audiences, which is a fair enough sales gimmick.But not to broadcast doesn't exactly enhance the sport in the viewers eyes. In the long run everyone may lose out due to TVNZ's supposed business manoeuvres.

DEREK CRAIG

The Presidents Report

besic problems confronting the world today susceptible to military solution' John F. Kennedy

statement, maybe a generation old, yet ance has not diminished. Hopefully the Association can involve itself more in and anti-nuclear issues this year. To date the tional Affairs Officer has preferred to conde on relatively petty matters internal to the s Association. I will be issuing an official for him to get involved with his portfolio that he was elected for.

ems I have to come to the rescue of another e position - Welfare Officer. The Welfare r has been engaged in full-time work this ich means unavailability to serve students I am planning an AIDS education week arming recent developments. As with the lonal Affairs Officer I will be issuing a forest on your behalf for the Welfare Officer working in such areas.

As promised a few weeks ago, I will be submitting a Presidential column from here on in. This was to foster a positive relationship with the student paper. I notice however my letters were not treated with integrity. The two letters were merg-ed into one, the supplied titles disregarded, '(sics)' were placed in the text, and the person whose ego was crushed mutilated my letter with unfactual rights of reply.

I'm not going to argue the 15 points he raised. My concern stems from the fact my letters were rights of reply to issues already raised by Craccum. They had their turn, I had mine. Editorial control does not mean always having the last word, and total lack of respect for the sanctity of letters presented.

Get it together kiddies! (Editors). If you want to fight me we'll get out in the quad on the microphone - as I'm afraid I haven't got a paper to abuse the Editorial bias. Give students news about their association - what happens etc. furthermore - why call student representatives 'politicians' when you're playing more political games than the rest put together. All petty bickering etc does is alienate students from their association - which they fund equally with you and I.

Enough raving. This Friday night (24th) at 8.00pm in the cafe will be the NORML clubs' Harvest Party. My advice is to be safe and pre-purchase tickets in the Ouad from the NORML stand.

Hopefully you all know about the stall on cost recovery in the cafe extension - open daily. If you don't go along to give maybe 20 minutes of your time to write a letter, you probably deserve to pay thousands of dollars a year for your education. Signing the petition is not enough on its own. You may say, 'Mmm... Yes... Well... O.K.... Cost Recovery's a really really bad idea, 'but this won't achieve a thing! Roger Douglas's most effective weapon on this issue may well be student apathy. Keep your eyes open - and remember clubs are now running bar up in Shadows on Mon, Tue, Wed

description of the relationship given above (in a positive or

You are involved in a 3-11 Sun Sign vibration pattern with the signs listed here opposite your own - in friendship, business, family or love relationships.

You'll feel a strong tie of friendship, whatever the association you share with these individuals. There will be mutual trust, and much ease of communication, back and forth. You are very different, yet these differences have little or no effect on your regard for each other. There could be a sense of responsibility, some sort of inescapable duty, that brings you together, and strengthens the bond between you. You'll find these individuals easy to talk with, and you'll constantly stimulate each other into changing habits and existing situations.

You'll probably form very close friendships with these people, and remain friendly always. Any quarrels will usually be quickly resolved, forgiven and forgotten. You may bicker and disagree frequently, and be annoyed by some mutual obligation that ties you together, yet be unable to avoid it - and even when the association seems to be a closed chapter - it will reappear months or years later, to be once more resumed.

CRACCUM Auckland University Students' Association Volume 57 June 14 1983

A BROADSLIDE...

The voting at last week's General Meeting could not have been more decisive. The results: 95% of the meeting voted no confidence in John Broad, the President of AUSA, and over 75% voted against sacking the CRACCUM staff. Also, the motions concerning Womenspace and Women's Rights Officer were withdrawn.

Over three thousand students packed the recreation centre for what must have been one of the best attended General Meetings in the history of the Association. Despite the obvious tension there was little disruption due to heckling. Overall the standard of debate was high and one felt that people were willing to listen to what was being said and to determine their position through analysis and not prejudice.

The meeting began at 1.15. The chair was passed to Bruce Gulley - President of the Association in 1977. The chair ruled that John Broad would be entitled to speak immediately before the movers right of reply - this decision was against standing orders but was made through fairness to the President.

Jonathan Blakeman, Treasurer of the Association and mover of the no-confidence motion, spoke first. His speech contained a point by point critique of the President's term of office and of his involvement with the Stamper Battery at Coromandel. He said that the President had failed to achieve any of his election promises and had failed to provide the Association with competent leadership. He cited the evasiveness of the President in providing explanations for his purchase of a landrover with AUSA funds. Mr Blakeman said that John Broad had at first denied knowledge of the purchase of the landrover at a cost of \$2,500. When pressured the President changed his story eight times.

Karen Bos, Administrative Vice-President and seconder of the motion, spoke next. She described how her opinion of John Broad had changed over the months. At the end of last year, after the extensive investigations into the financial affairs of John Broad, she decided to give him the benefit of the doubt and accepted in good faith his admission of past mistakes and his promise to change his ways. The events of this year have gradually led her to view the President with grave suspicion. After a meeting of the Executive held to work out a solution to the problems, she was part of a delegation to the President to present their proposals. She said that the President totally ignored them and said that he did not need to work with the Executive because he had the support of the Engineering and Medical students.

Peter Nathan, the President of the Medical Students Association, then spoke in support of the President. He described how he had always found John Broad approachable and had found him very supportive. He urged students to vote against the motion.

There followed a series of speakers alternating in viewpoint. A number of people who had worked with John Broad at the Stamper Battery in Coromandel spoke. Some, in support of John, put forward explanations for the discrepancies in the accounts of the project. Others, including the Foreman (sic) over the '81-'82 summer, expressed their concern of the Presidents handling of the funds, alleging that hundreds of dollars of AUSA money had been misappropriated. The issue of the landrover was left unexplained.

At around this time a motion to stop on the motion was put. The chair did no motion. A further motion to disagre chairs ruling was put. This was lost and able to continue.

John Broad chose to speak earlier the entitled. His address to the meeting sh strain that he must have been under. He the campaign against him as being a procertain people who could not accept losin at last years election. He said that th opposed him did so because of political man regards his term as President, he said the opened up AUSA to students. John aborthat he did not propose to get involved slinging. When he had finished his spee left the meeting.

Following the President in the speaker David Kirkpatrick, the President of 11982. His speech was very articulate likely caused many to rethink their stan issue. David began by describing the between the last three Presidents Association : himself, John Broad and McIntosh. He said that they were all laws with a relatively conservative political Over the past two years those member Executive which were now seeking John dismissal had never sought to roll either Wayne McIntosh. This indicated that it matter of conservative vs liberal politic conflict had been handled in the past seeking the removal of anyone on eithers issue, he said, was the ability of John Bro President. To David Kirkpatrick there doubt that John Broad was dishon untrustworthy.

He ended his speech by saying that his concern was for the well-being of AUSA an was a great pity that John had not resignand saved AUSA the embarrassment of President. David was given a standing on

The mover of the motion, Jonathan B then took his right of reply. The motion AUSA has no confidence in John President" was put. It was carried by well two-thirds needed to settle the matter the

Jonathan B

The motion in John F

arried by well the matter th

S.B. How would one term the work one is involved in regards to Maori Health? Uncle Jerry: Maori mental health is a field beyond the scope of in many cases logical materialistic, scientific and even medical terms as we are aware of in the society that we the maori has been 'introduced' to over the past 187 yrs, the stress and strain in adapting to a system foreign to a Make up fo the inner self, the harmonious rhythm pertaining to a Maori mental patient in my solemn view warrants the injection of, if one can call it that, a re-energising spiritual booster to the patient, wherein the harmonious rhythm within the patient is restored, and by the same token spiritual and

physical maintenance is achieved. S.B.: Why are you doing this work? Uncle Jerry: The truth hurts and how it hurts when one knows.

The 'Holy-Truth', that's why I'm doing it. ie those who feel it, know it. S.B.: What influenced you to be a part

of the 'A-Team'? Uncle Jerry: A sense of duty pertaining to my cultural upbringing in regards to the response to share one's ability to help

thy fellowman. S.B.: Who organised this 'A-Team'? Uncle Jerry: That's a million dollar question, being what I am in regards to my culture and heritage as of a Maori, this question can be answered in many ways and it will be quite correct, therefore any one of a given answer to above question will do justice to the question even though it will contradict

each individual answer. S.B.: When did it all begin?

Uncle Jerry: Approximately eight months ago.

S.B.: Do you have a specific meeting

Uncle Jerry: Does the universe, that we can see have three specific moons to guide us at night?

S.B.: Can you give any case that was particularly satisfying.

Uncle Jerry: That answer is better left to the institutions we share our input of help with, they are in my opinion better qualified than we are to answer that particular question.

S.B.: What sort of response do you get from orthodox practitioners?

Uncle Jerry: Again that answer is bettere left to the practitioners of the institutions we co-ordinate with.

S.B.: How many cases approximately have the 'Team' dealt with.

Uncle Jerry: Enough to give the 'Team' initiative to continue the concept of its

S.B.: Are you affected personally by the types of cases you see and deal with? Uncle Jerry: To be quite honest no, speaking as a member of the 'team' personally as an individual in my own right, being a servant to my 'God' I carry out my duties to 'Him' not beholden to anyone else but to 'Him'.

S.B.: What problems have you encountered?

Uncle Jerry: On duty no problems.

S.B.: What directions can you see Maori mental health going?

Uncle Jerry: As long as the upsurge of modern day living momentous is with us the Maori mental sufferance shall treble in the turn of the century in the year 2000 AD. To counteract that flow I sincerely believe that by introducing back to each individual case the Healing-Powers of Nature.

S.B.: There are apparently 76 elders altogether representing how many Tribal-Areas?

Uncle Jerry: Tribal-affiliations is in my opinion not the answer to this question 'Fellowship' to me is a much better word to describe our very existence as 'Te Roopu Pakeke O Mangere' even though we belong to all points of the compass. S.B.: Do you have the resources to tackle such a wide problem.

Uncle Jerry: Dependent in what direction that question is aimed. If the question is towards monetary resources then the answer is simply no.

S.B.: Where do you get referrals from? Uncle Jerry: From the nucleus of the problem, nowhere else.

T.J. Moana Tainui, Waikato-Maniapoto

In conclusion, it is my contention that the well being of Maori people has been (and still is) negatively influenced by colonization. To see and know the pain that has become a daily part of our lives. The 'A Team' therefore symbolises to me the great love and hope of our people, and that one day we will stand as one, strong and beautiful. Hei aha, kia kaha te Mana Maori Motuhake!!!

AUSA

AUSA NOMINATIONS

NOMINATIONS are invited for the position of: ENVIRONMENTAL AFFAIRS OFFICER NATIONAL AFFAIRS **OFFICER** STUDENTS' REPRESENTATIVE COUNCIL (CHAIRPERSON)

Each member of the Association is eligible for nominations for these positions provided that her/his subscription has paid **BEFORE** been nomination.

NOMINATIONS must be in writing and signed by at least three (3) members other than the nominee. Nomination forms are available from the Association Reception during office hours.

The term of office will be from the time of appointment to 31st December 1987.

NOMINATIONS close with the Secretary at 5pm Thursday 23rd April 1987, and a by-election will be held by General Ballot on Tuesday, Wednesday, 28th and 29th April 1987.

NOMINATIONS are opened for the position of: RETURNING OFFICER

for the upcoming by-election and referendum to be held 28th and 29th april 1987.

There is a remuneration for this position.

NOMINATIONS close at 5pm Thursday 23rd April 1987 and an appointment will be made shortly thereafter.

NOTICE TO ALL **CANDIDATES**

AUSA is intending to publish a By-Election and Referendum Special to publicize the upcoming By-Election and Referendum to be held on 28th and 29th April.

We will need your policy statement and a photo by the time the nominations close at 5pm Thursday 23rd April 1987.

If you don't have a photo, let us know by Wednesday.

You might detect a sense of urgency in all this but if the Election Special is to be out by Monday 27th, we will only have one day to work on it.

P.S.: Policy Statement should not be more than 350 words.

> Pilar Alba **SECRETARY**

READABLE LETT

ON DEATH & GRIEF

Dear People,

Thanx for your sensitive article on death and grief. I tend to agree that western society is not good at coping with either of these subjects. You say that in the main man has coped with death by 'avoidance, denial, superstititon, and belief'. I think perhaps it's fair to say that these are reactions to the fear that usually surrounds death. Can I suggest however that much of the grief and fear could be eliminated by the addition of two words to your little list above: trust and certainty. The Bible says faith is being sure of what we hope for (Hebrews 11:1 - check it out). That's not blind faith, but an absolute trust in an absolute God, and no empty hope, but a certainty of being with him after death. While I realise that grief is always real, I don't see how you can be afraid for yourself or anyone else if you're certain of what death will bring them, if they have that trust. But if you're uncertain, perhaps you could save yourself some grief and fear by finding out?

Ri Weal

BLOODY DEATH (a response)

Dear Craccum,

It is with extreme anger and rage that I write this. Continually I see the inclusion of a stolen Maori aspect in an 'article' to put a 'nice' bit of brown icing on the white cake. This smacks of cultural imperialism. The abovementioned 'article' is disrespectful, incompetent, blase and has an underlying tone of triviality. It is not good enough! Not as a flimsy bit of tokenism.

Even the picture used in the arm lustrating' the 'concept' of a tank a mihi, a greeting (hongi). How de use that in the context of death time write about something you some degree of 'competence' in, and hanging off the backs of Maori a

BONKING OFF?

Dear CRACCUM,

Reading last week's issue I was hear that some people the Bonkspace as a bit of a joke la joke will be on the students h it goes ahead.

The \$20,000 required to b cubicles will only cover the in struction. The ongoing costs laundry, maintenance etc coul another \$5,000 to \$10,000 eva This is not to mention the opportunity

Finally, the credibility of students cerns in election year would bit of a joke. The media could ly portray students as a grow mature rich-kids freeloading of payer. And then who will be a

m appalled at the plan to sell the oln capping rag, RAM, on the eckland Campus this year. The icial in RAM amounts to sexual and harassment. The men who proe this stuff must be very insecure if have to denigrate those who are not male and heterosexual in order to In few laughs. The fact is it's bloody

w for us, as men, to rest on our pre-. I wonder if the 'real Kiwi jokers' 'humour' is aimed at have the guts seriously consider what women, eks and homosexuals have been say-

for years about RAM. **Jelinek**

S & M

Dear Craccum,

As regards the proposal for a bonk space I think this is a fab idea. For years I have been a dedicated bonkophile enjoying many a good hard bonk with my male flatmates.

It's disgusting the way people who are simply after a saucy bonk must lurk around lavatories trying to solicit a fellow bonker. Bonkspace I think will at last give bonkers a chance to meet and experience the forbidden bonk subculture in privacy between consenting adults. Don't get me wrong, I'm not a pedeobonker or anything and I like the feel of a good hard bonk with my girl friend Walter as much as with any trendy guy, it's just that bonking is a kind of social no and the varsity has a duty to satisfy my urges in this way.

Most people think bonking is an illness, a perversion or something. It's not!!!!! It's a natural trusting giving experience, something that 62.5% of males feel for each other but must hide because of a

few Victorian bigots.

Support for Bonkspace must be found. It's clean, hygenic and doesn't involve monkeys or lamas. As a Christian Bonker I don't think that God has abandoned me or anything, he gave me this urge and despite what so called correct Christians say I know that having a hard sweaty bonk with three or four chums is a good thing.

Bonking is safe and fun and we appreciate the chance to bonk without fear of interruption and exposure. Maybe even a mens room could be made available where bonkers can meet without fear of harassment.

What is a good bonk? It's feeling your mate strike you right between the eyes with a small rubber mallet in rhythm to your brain. It's unique, fun and quick and a friend with a strong right arm is

So I for one support bonkspace if it's used purely for the purpose of furthering insights into the mind. Bonk space should be for bonkers. As for using the bonk rooms for sex; that's disgusting. What kind of animals would do things like that. Yuk and Phew. Some people have the sickest minds....

Yours feeling like a bonk

(President of the Bonk Rubber Mallet

CRACCUM PRAISE

Dear Editors,

Craccum is improving. The articles on Atlantis and Russia were good. Shock!! The Lettuce is getting readable. Even the interviews are passable (Last week's gravestone interview was tremendously informative). I think FAIG needs to be shown the back door and pro/anti Christian arguments should be banned - they get extremely tedious. I'll stop writing now before you fall in love with yourselves and Craccum deteriorates. Now I'll write an abusive letter.

Woof la Poof

"I DANCED"

Somewhere hiding under a desk in the English Common Room. Dear Craccum and 'Angry of

I danced to 'American Pie' mateys. (snort, snort). How, you ask? Well, first like Neil swaying to 'White Shade of Pale', after sniffing Amyl

Nitrate, just like George Michael. Then when the song REALLY starts sounding like CLIFF (the Chevvy to the Levee bit) I started my groovy Brooklyn Hustle (right on!) Spurred on by audience reaction I progressed into the crowd and began to grapple and pogo with the other likely looking groovers (you see the chain of social evolution).

For my troubles I received six punches in the head, three boots up the rear-gear, one headbutt, and assorted

beer cans, rotten fruit, uprooted plants etc, etc. And readers, before you accuse me of having an I.Q. lower than my shoe size, let me assure you that I wear a size 10, (sometimes) larger than Sly Stallone

I remain, bruised but enthused (and not the People's Poet as you may have thought by this clevedr rhyme)

Trapper John R.D. (rum drinker)

BOOK COST

Dear Craccum,

Wonder why books cost so much? - you know that 180 page text in paperback at \$40 plus. Well take a look at this document.

Yep, at a 100% markup if you do the currency exchange calculations and allow that shipping and insurance may be included in this invoice.

1. Customs has no tariff on text books, except the usual G.S.T. on the total land-

2. Could not more of the 35% discount offered the bookshop by the publisher, be passed on to the students?

3. Can't the Students Association move to take over the shop entirely, thus removing Whitcoulls in whose interests it is to keep prices high in order to protect their other outlets, and be in a better position to offer students a better deal, considering the amount, and rapidity of stock turnover.

As a member of the Students Association it's not a nice feeling to think one is being ripped off by a co-operative that one partly owns and patronizes. J.W.

U.B.S. Replies

Dear Editor,

J.W.'s textbook pricing example may appear startling at first glance, but the documentation is incomplete. On lower value textbook invoices such as this, freight and insurance charges average 15-25% of invoice value and buying house service charges or the alternative, bank drafts, average 12-20% of invoice value. Exchange rates are more favourable now than they were at the date we were charged for the books.

Our post G.S.T. gross margin on text books is probably lower than most other New Zealand student bookshops whether they are wholly owned by students, private companies or joint student/Whitcoulls ventures such as ours. The bookshop takes its role as textbook supplier very seriously and we often cut back normal retail margins heavily, especially on very expensive textbooks.

Students receive considerable benefit from bookshop funds paid directly to and administered by the Students Association. The Bookshop Fund has bought carpets, curtains, TV's and Pianos in the Student Union Building and rebuilt and furnished student club and activity areas. No doubt the Students Union Fees would be higher without this use of Bookshop funds, thus negating the benefit possibly accruing from any slightly increased discount to individual students.

If J.W. (or anyone else) would like to discuss the matter further I would be happy to see them.

> Regards, Kitty Wishart, Manager.

PAUL SAYS

Craccum,

The Editors.

With reference your Issue Number 6 1987 in which you allowed space for 'The Oldest Hack, Marion Adams' to warn the people of my being a '... lovely chap...; thank you.

For information leading to my meeting this Marion person, I offer as reward one Australian dollar piece.

I have the honour to be, P. MacD. Gourlie in love with life!

WHAT ACCOUNTS?

Dear Editor,

I wonder if the Treasurer could clarify which set of accounts he was publishing in the CCCP issue of Craccum. There is a variety of dates mentioned.

David McNeill Ed's Note: These accounts were for the 1985 financial year, the dates unfortunately were mixed up in the rush to get them to print.

USA ENEMY!

Dear Craccum,

Attention Sheryl Jackson, who last week was so nice to point out how morally wrong the USSR is. Well if we are going to start hacking states to pieces let's really get into it. I say the USA is much more Knackered than the USSR. Proof - the USA has slums while the wealthy go skiing. The USA has a huge crime rate (along with a corrupt police force). The USA has huge social problems including drug abuse. And last, if not least the USA is militarily morally wrong - they impose their presence all around the world nad profit from arms sales to anyone who has the cash.

If we are so ready to include the USSR as a 'moral enemy' of NZ for the feeble reasons stated by Sheryl, then surely we must include the USA as a moral enemy of NZ (for my slightly less feeble reasons).
